

Esteemed Anesthesia Colleagues:

The International Federation of Nurse Anesthetists (IFNA) is seeking information on the scope of practice of nurses that provide anesthesia in its member countries. The hope is that the gathered information will help the IFNA devise plans to advance the practice of anesthesia in its member countries.

Please 'click' the hyperlink below and complete a short survey.

Mr. Cameron Oliver, a graduate student in Nurse Anesthesia, has developed a survey to compile the information requested regarding the practice of anesthesia. As part of Mr. Oliver's graduate research project, he will statistically analyze the information and present the information at various anesthesia meetings, as well as post the findings on the IFNA webpage.

The survey is directed towards nurses and non-physicians that provide anesthesia. If the person filling out the survey practices as part of an Anesthesia Care Team (physician and nurse team), the term 'anesthesia provider' as it pertains to the survey means the person filling out the survey (a nurse or non-physician).

Please share this email with as many anesthesia colleagues that wish to contribute. The information collected will be kept in strict confidence. Questions regarding the survey can be sent to [oliver.cameron@mayo.edu](mailto:oliver.cameron@mayo.edu). Survey participants who fill out the optional personal information (question #10) may be contacted to clarify survey answers.

Thank you for your cooperation,  
Sincerely yours,

Sandra Ouellete, CRNA, M.Ed, FAAN
